## TECHNICAL SKILLS:

- JavaScript
- JQuery
- Angular JS
- React
- SQL
- Postgres
- Express
- MongoDB
- Redux
- Node js
- Material UI
- CSS
- Postman
- HTML5
- Passport
- Chrome Debugger
- VS code Debugger
- Object Oriented Programming

## EXPERIENCE:

### Prime Digital Academy

January 2018 - Graduation (June 2018)

#### Solo Project: Water ya up too?

- I created this app to be able to stay active outside without having to look up an establishment and search reviews to see if i can bring my dog with.
- Water ya up to was designed with an active lifestyle in mind, for you and you pet. This app allows a user to find local public water access to drinking fountains and restrooms and pet friendly restaurants nearby.
- The technologies I used to write this app were React, Redux, SQL Database, Passport, Material UI, and Postman.

#### Group Project: SVC

- The SVC: sexual violence center, is a non-profit organization located in Minneapolis, that helps individuals cope with the effects of recent or past violences. The current software that SVC is using is cumbersome, and lacks the necessary features needed for accurate reports.
- The SVC would benefit from having reliable software that they can trust will accurately report their numbers in order to stay funded. My group and I are changing the current program from Angular.js into React.js. In order to save important information we are making a new database that is easier to read, ensuring that SVC can continue with their priceless services without losing past data.
- The technologies used in this project will be React, Redux, SQL, Passport, Postgres and Material UI.
